

Bheemanapalli Lalith Charan

Guntakal, Andhra Pradesh, India

lalithcharan111@gmail.com | +91 9701990126 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile Summary

Computer Science student with strong Python scripting ability, foundational networking concepts from B.Tech coursework, and hands-on experience building and securing full-stack applications with role-based access control. Comfortable troubleshooting access and authentication issues, maintaining structured documentation, and following strict compliance and quality guidelines. Genuinely interested in building a career in IAM and cybersecurity, with a fast learning curve and strong analytical thinking.

Technical Skills

- **Languages:** Python, JavaScript, SQL
- **Access Control & Security Concepts:** Role-Based Access Control (RBAC), Authentication, Authorization
- **Systems Fundamentals:** Networking fundamentals, Operating Systems concepts
- **Backend & Databases:** Django, Flask, REST APIs, MySQL, SQLite
- **Core Fundamentals:** Object-Oriented Programming, Data Structures & Algorithms, Problem Solving
- **Tools:** Git, GitHub, Visual Studio Code

Education

B.Tech in Computer Science & Engineering (AI & ML)

Parul University, Gujarat

2023 – 2027

Current CGPA: 6.32/10

Experience

AI & ML Intern – Learnflu

Nov 2025 – Mar 2026

- Completed structured training applying core programming and systems concepts to practical, industry-relevant tasks.
- Strengthened hands-on debugging and troubleshooting skills through guided assignments and code reviews.

AI Data Contributor – Project Heimdall, Deccan AI Experts

May 2026 – Present

- Follow detailed technical guidelines and quality benchmarks with consistency, directly relevant to compliance and process documentation work.
- Collaborate within a distributed, deadline-driven team, communicating progress and technical clarifications proactively.

Projects

Blood Bank Management System

[\[GitHub\]](#)

Built a Django-based full-stack application implementing role-based authentication and access control for multiple user types (Admin, Donor, Requester), managing permissions and secure data access across roles.

AI Student Report System

[\[GitHub\]](#)

Built a Flask-based backend integrating a trained ML model into a REST-based data pipeline, requiring systematic monitoring and troubleshooting of data flow and access.

StudyMind – RAG-Based YouTube Learning Assistant

[\[GitHub\]](#)

Built a Python-based application integrating third-party APIs, managing secure API key handling and authentication for external service access.

Courses and Certifications

- Deloitte Technology Job Simulation – Forage
- GenAI Powered Data Analytics – Tata Group (Forage)
- AI-Powered Excel & Power BI Micro Course – SkillCourse
- Vadodara Hackathon 6.0 – Participant
- Campus Ambassador Program – KiTech

Achievements

- Solved 175+ DSA problems on LeetCode with a Contest Rating of 1480, earning the 100 Days Badge. [\[LeetCode\]](#)
- Completed 59% of the Python Skill Track on HackerRank, reflecting consistent programming and problem-solving practice. [\[HackerRank\]](#)
